**LETTER OF RECOMMENDATION**

I feel great pleasure in testifying the ability and capability of Mr. Amit Kumar, who is a computer science major in Masters of computer science program in Troy University. Amit is well known to me for the last six months, first as a student in my classes for courses Analysis of algorithms and distributed systems and then as a research advisee in my research group TrACKNet. I am guiding him in his thesis on “**Big Data Analytics**”.

During the interaction with him as a teacher I observed that he was keen and attentive and did the projects and assignments with insight and care. His enthusiasm to learn new things and ability to comprehend the intricacies of the subjects make him a distinct student. Amit has been a dedicated student and he has proven to be a take-charge person in the class who is able to successfully develop plans and implement them.

During the course of the research work he exhibited his ability to handle complex problems and come out with tangible solution. Through his personality of being an analytical person, he is able to view a lot of research problems from a broader perspective. He is a team player, who with a high degree of motivation, innovation, initiative and organization, can accomplish his goals.

He possesses very good presentation skills and prepares his presentation according to the audience. He is proved to be a great helper and he was not afraid of the responsibilities. He has been very pleasant personality and easy going. Students who interacted with him shared the same view. He has excellent communication skills in both written and spoken English. Besides demonstrating his fluency in the language, it also revealed his inclination to make sure that his point was fully comprehended by all.

In view of the above, it is clear that, he has every ingredient in him to excel as a Graduate Assistant. I strongly recommend Amit for the post of Graduate Assistant in your department.

**Suman Kumar**
